Contract Option Specifications

Name	Ticker	BBG	Underlying		Exchange	Premium Style ⁸	Curr	Contract Size	Tick Size	Tick Value	Trading Hours (Exchange)			Time Zone	Settle Style	Rule of Exercise	Daily Exercise Cutoff ¹	Expiry Time ²	Settlement Price	Settlement Price on Bloomberg
			Deliverable	Type							Open	Close	Open							

¹ The time, where we at the latest will notify the broker about exercise requests on american options. Our broker have a similar to the exchange. Any Exercise requests initiated after this time will be processed the next day; if not last trading day.

² Expiry time is the last time where an option contract can be traded on last trading day. Exchange time.

³ Serial options will be exercised into futures and quarterly options will cash settle.

⁴ Quarterly options expire at 08:30 CST, same time as the future, and settle in cash!

⁵ AEX daily options are listed on the business day prior to the expiry day, so the initial lifetime of daily options are two business days. There is no daily option expiring on Friday because there are already weekly or monthly options expiring.

The trading symbol is directly linked to the date on which the option expires. For example, the daily option that expires on Wednesday February 6th has the trading symbol "A6" and is available for trading from Tuesday February 5th.

⁶ Weekly option symbols always start with AX, followed by the week of the expiry, so either 1, 2, 4 or 5. There is no separate AEX weekly option class expiring on the third Friday of the month, as the week leading up to that day is the last week of trading in the AEX monthly options expiring that month.

⁷ Japanese government bonds actually has three sessions, they are: 8:45 to 11:00, then from 12:30 to 15:00 and then from 15:30 to 23:25 JST.

⁸ There are two different ways to calculate margins on our options. The first is full premium, which means you're paying the premium up front and it will be charged to your cash balance. The second way to do this is futures style premium, which you can translate to variation margin, like on futures contracts. Saxo Bank will treat future style premium options as deferred premium. As such, other than market conventions, unrealized profit/loss is not processed in the clients cash balance on a daily basis. Instead, the original premium amount will remain on the transactions not booked until final settlement of the option or when the position is closed. For more information see the Sales Kit for Contract Options.

⁹ Trading in Index options will ordinarily cease on the business day (usually a Thursday) preceding the day on which the exercise-settlement value is calculated. ☒

¹⁰ Trading in End of Week SPX options ordinarily cease trading on the business day (usually a Friday) that the options expire. ☒

¹¹ Last trade day is the Tuesday prior to the Expiration Date of each month. ☒

¹² Tick size is 0.01 for prices below 1.5 and 0.05 above 1.55

¹³ Settlement price is the CME Lean Hog Index price on the day after last trading day, as the final settlement price is calculated over two days.

Disclaimer - General

None of the information contained herein constitutes an offer (or solicitation of an offer) to buy or sell any currency, product or financial instrument, to make any investment, or to participate in any particular trading strategy. This material is produced for marketing and/or informational purposes only and Saxo Bank A/S and its owners, subsidiaries and affiliates whether acting directly or through branch offices ("Saxo Bank") make no representation or warranty, and assume no liability, for the accuracy or completeness of the information provided herein. In providing this material Saxo Bank has not taken into account any particular recipient's investment objectives, special investment goals, financial situation, and specific needs and demands and nothing herein is intended as a recommendation for any recipient to invest or divest in a particular manner and Saxo Bank assumes no liability for any recipient sustaining a loss from trading in accordance with a perceived recommendation. All investments entail a risk and may result in both profits and losses. In particular investments in leveraged products, such as but not limited to foreign exchange, derivatives and commodities can be very speculative and profits and losses may fluctuate both violently and rapidly. Speculative trading is not suitable for all investors and all recipients should carefully consider their financial situation and consult financial advisor(s) in order to understand the risks involved and ensure the suitability of their situation prior to making any investment, divestment or entering into any transaction. Any mentioning herein, if any, of any risk may not be, and should not be considered to be, neither a comprehensive disclosure or risks nor a comprehensive description such risks.
