

Market Data

Subscriptions for real-time prices

All equities trade on actual market data from the stock exchanges. To receive and trade on real-time market data, you will have to subscribe to the individual exchange.

A subscription to live price data from an exchange gives you access to live prices on Stocks, Single Stock CFDs, ETFs/ETCs and CFDs on ETFs/ETCs from the particular exchange.

An Online Subscription Tool is available in the trading platform. In the tool, you will find a list of available exchanges and news services alongside the applicable monthly fees. You will be able to subscribe and unsubscribe to services of your choice. Further information can be found in the Subscription Tool guide, which is also available on the trading platform.

Level 1 or Level 2 data

Level 1 price data refers to the first level of the order book on the exchange. With a Level 1 subscription you can see live, streaming, bid and offer prices.

With a Level 2 price data subscription you can see live, streaming prices as with Level 1 but on top of this you can see the market depth of bid/offer prices and the amounts available at each price point.

Number of devices/users on NYSE	Professional Investor	Private Investor
2 Devices or more	USD 30,00	USD 1.00

Data fee refund for active equity trading

For clients who trade equities and subscribe to real time market data, G&T TRADER has introduced a refund scheme where fees are refunded per exchange should clients trade a minimum of four (4) times across both stocks, ETFs and/or CFDs during each calendar month.

For the Australian Securities Exchange the minimum is six (6) trades.

Refunds are only applicable for non-professional clients subscribing to level 1 data, except for the Australian Securities Exchange where the refund applies to level 2 data.

The definition of non-professional and professional subscribers may vary by exchange. Refunds are calculated on a monthly basis but paid out on a quarterly basis.
