

Trading Conditions & Prices

Commissions

As ETFs/ETCs trade on regular Stock exchanges, commissions follow the commissions for Stock trading on the exchanges.

See [Commissions for Stock Trading](#)

Use ETF/ETC portfolio as collateral for margin trading

We normally allow up to 75% of the current value of your ETF investments (50% of ETC) as collateral for margin trading.

Live Market Data

By default, clients have access to delayed market data on the equities (including ETFs/ETCs) and futures exchanges on which they are enabled to trade.

To receive real-time market data, clients will have to subscribe to the individual exchanges. A subscription to live price data from an exchange gives you access to live prices on Stocks, Single Stock CFDs, ETFs/ETCs and CFDs on ETFs/ETCs from the particular exchange.

Read more about subscribing to [live exchange data](#).
